Professional experience

Stellar 2018–Present
Software Engineer, Founder

Served as the founder of a lead generation and web development firm in Denver, Colorado. Designed environments for releasing **accessible landing pages tailored to convert** ad campaigns. Focused on beautiful, lightweight pages for fast load times on everything from international 3G to broadband devices.

○ **Developed a rich suite of frontend libraries** for rapidly launching and iterating on serverless landing pages for ad campaigns
○ Managed thousands of dollars in monthly ad spends
○ Generated up to 100 quality leads for clients each month

Cool Story 2010–2016
MakeAGif.com, MakeADare.com, et al.
Software Engineer, Co-Founder

Served as the technical co-founder for high traffic entertainment and social media websites. Solely designed, programmed, and scaled multiple web properties from zero to **millions in daily visitors**. Exited two properties via a sale of assets.

○ Delivered as many as **12 million page views** to 1.8 million visitors per day with **99.99% uptime**
○ Reliably served content which created up to $1M in revenue per year at a **75% margin** on infrastructure and bandwidth costs
○ Transcoded as many as 5,000 videos and GIFs each day targeting mobile and desktop viewing devices

Skill set

Grit

Self-employed for entire professional career

Engineered, grew, and exited two self-funded, **high traffic** websites

Software

12 years developing websites
5 years programming in React
85+ free open source libraries
10k+ weekly npm downloads

UI/UX

Began career in visual design
13 years in user experience
2 years in professional branding

Technologies
